Summer Program

Over the summer we have been consistently connecting with YMWAP participants and many alumni, have held weekly dinner meetings, and had a mentor dinner in August. We were part of a Boston initiative called Save R Streets, leading sports activities and games with younger kids at Love Field. Other summer activities included recreation and personal fitness training, community service/neighborhood cleanup, financial literacy studies, and a photography class. YMWAP also served as a PIC jobsite.

Fall Program

We look forward to weekly groups, solidifying our 10th grade roster, and helping 12th graders with success planning! We believe mentoring will be key to supporting students following the multiple losses, trauma, and disruptions of the past 18 months.

We want to be a source of support for schools and students, ideally returning to the norm of working with your students both inside and outside of schools. School leaders, please let us know your thoughts on school access for YMWAP leaders.
